

Environmental Policy

Across the Assetlink Group, we acknowledge our potential to negatively impact the environment. We accept that minimising harm to the environment and delivering environmentally sustainable outcomes as both a social responsibility and an intrinsic way we conduct our business.

Our commitment:

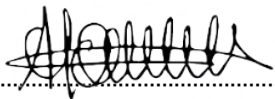

Assetlink are committed to reducing our environmental impact through continuous improvement of performance to ensure a sustainable future for generations to come.

As an Organisation, we will:

- Identify where we impact the environment and implement controls to prevent harm.
- Actively listen to our communities and their concerns on environmental issues.
- Set environmental objectives and targets and monitor progress to plan.
- Equip our people for success through training and awareness.
- Instil a culture of reporting, to learn and further improve.
- Embed waste and energy minimisation processes across our work lifecycle from purchase, use and disposal.
- Partner with our clients to help them achieve their environmental objectives.
- Apply a systematic approach to Environmental Management, consistent with ISO14001.
- Comply with all applicable legal, regulatory, industry and corporate requirements.

As a Team Member, we will all:

- Take personal responsibility to protect our environment.
- Report environmental incidents and contribute improvement ideas.
- Treat our environment and the community with respect in all that we do.
